

**IBEC PROPOSES THAT THE ICEC 2016 BE PERFORMED
IN RIO DE JANEIRO, MORE BEAUTIFUL CITY OF BRAZIL**

Cost Engineer's Day 2012

In May, the IBEC - Brazilian Institute of Cost Engineering has completed 34 years of its founding and held ceremony and cocktail party to celebrate it in the state of Rio de Janeiro, according to Law No. 4.905/2006. To mark this date, IBEC honored "Cost Engineers of the Year", "Person of the Year" and "Highlights of the Year", professionals who have excelled on the national scene.

National Day of the Cost Engineer

Congressman Edinho Bez, author of the bill providing for the creation of the National Day of Engineer Cost, will be honored by IBEC on July 9 during the First Brazilian Forum of costs, in Florianópolis (SC).

A commendation for the recognition of the MEP professionals would be delivered during the birthday party of the Institute, but Bez was unable to attend.

The Forum covers the whole country since 2011 in Regional Sessions, has gone through Cuiabá, Rio de Janeiro, Belo Horizonte, Vitória, Brasília and Fortaleza, to discuss and refine a proposed "Technical Guidance" prepared by IBEC to align the current differences associated budgeting for public works and projects. Will end with

the National Session to be held on August 3 in Sao Paulo.

1st Brazilian Costs Forum of Public Works

The IBEC held since November 2011, the 1st Brazilian Costs of Public Works in order to equalize the conceptual differences regarding the cost of public works, which are mainly present in the relations between public agencies contracting, Public Bodies Audit and Inspection and businesses construction, the IBEC proposes the establishment of a Technical Guidance to allow budgeting pre-bidding within the existing technical criteria in Cost Engineering.

This Forum is being held in a shifting in major Brazilian cities, where trade associations, government agencies, associations and unions, so all these local, state and federal, are giving full support to their achievement. The organization of this Forum is led by IBEC, which is providing its technical team of experts in engineering costs to consolidate the proposals presented and their operational staff for planning

and conducting these events. The financial viability for the sessions of the Forum has been made possible by the Associations and the interested public agencies.

The final event of this Forum will be in São Paulo, where it will then be discussed and approved the final version of the THECNICAL GUIDANCE proposed . The Forum takes place in regional sessions and has toured the

cities of Cuiabá / MT, Rio de Janeiro / RJ, Belo Horizonte / MG, Vitória / ES, Brasília / DF, Fortaleza / CE. The city of Florianópolis / SC will receive the next and final Regional Session. The National Meeting will take place on August 3 in Sao Paulo, which will also be broadcast via videoconference free!

World Congress on Cost Engineering in RIO Brazilian Dream

In order to consolidate the Brazilian engineering costs on the international scene, the IBEC aims to host in BRAZIL, in 2016, the World Congress on Cost Engineering sponsored by ICEC (International Cost Engineering Council). The next event takes place in 2012 in Durban, South Africa, where the IBEC will present its proposal. In 2014, it will be time in Milan, Italy, receiving the appointment.

Brazil is a strong candidate for 2016, since the next year will host sporting events (World Cup 2014 and 2016 Olympic Games) and is currently hosting the Rio +20, planetary grouping that aims to define proposals for environmental sustainability especially for the climate issue.

PROTEC

Complete 34 years does not mean living in the past. Thinking about the future of Cost Engineering in the country, the IBEC launches PROTEC - Employability Program for Cost Engineering Technicians. The program's goal is to introduce the concept of science education in the cost base, forming new managers of science and ensuring employability in the sector is expanding. Among the goals that the Institute intends to achieve compliance are ten thousand school students with technical education in all regions of the country. Moreover, it is expected that in coming years, grow the number of professionals working in the segment of Cost Engineering.

For the institute's president, eng.

Paulo Roberto Vilela Dias, the project will create more opportunities for specialization for students of technical education.

"We have seen that lack expertise in this segment so important in engineering. So we created the program, encouraging further studies and ensuring a quality education in the field of Cost Engineering in the country," he said.

The first edition of PROTEC was held in 2011 in the state of Espírito Santo and the second began on May 19 this year, the city of Rio de Janeiro, (departing counting) with over 60 students present. Soon, other cities will receive the project.

PROGRAMA DE EMPREGABILIDADE PARA
TÉCNICOS EM ENGENHARIA DE CUSTOS

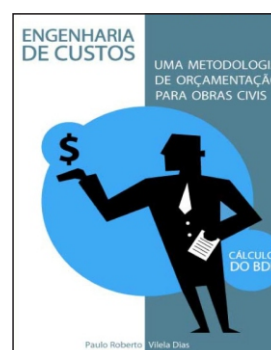

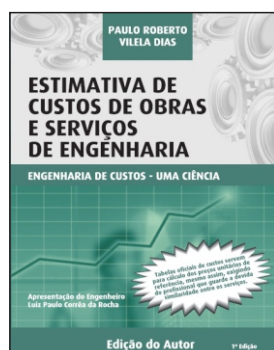

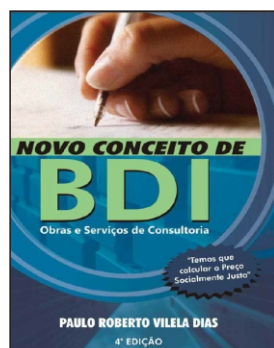

Books for everyone

Seeking growth in the use of digital books and readers, the IBEC went ahead and already available on your site all works published by its Chairman, Eng. Paulo Roberto Vilela Dias.

The intention is to enable free access to works anywhere in the world. In addition, works are obligatory references to the practice of Cost Engineering in Brazil.

To the engineer, the IBEC is fulfilling its social role by providing the works. "We are a nonprofit. We do not sell the book, but provide an opportunity for professionals around the country to access this information at no cost," he said.

Brazilian Personalities that make up the organizing committee of the World Congress on Cost Engineering 2016

Paulo Roberto Vilela Dias

(President of the Brazilian Institute of Cost Engineering)

José Chacon de Assis

(Ex-President of the Regional Engineering, Architecture and Agronomy Council-RJ - CREA-RJ)

Edinho Bez

(Congressman)

Luiz Paulo Corrêa da Rocha

(State Representative)

Paulo Ramos

(State Representative)

Francis Bogossian

(Club President of Engineering-RJ)

José Tadeu da Silva

(Federal Council of Engineering and Agronomy)

Agostinho Guerreiro

(President of the Regional Engineering, Architecture and Agronomy Council- CREA-RJ)

Aldo Dórea Mattos

(Project Management Professional-PMI)

Sérgio Arantes

(Manager of Engineering Costs and Estimated Arrival Times of PETROBRAS)

José Chacon is Delegate of the IBEC at ICEC

José Chacon has just been nominated for Peter Smith, by Paulo Roberto Vilela Dias (President IBEC), such as Delegate in ICEC.

Since 1978, the IBEC operates in several states, promoting the engineering costs as a multidisciplinary science.
